

# PERSONALIZED PREMIUM FITNESS EXPERIENCE FOR BETTER HEALTH & FUN

ClimbStation is an attractive climbing wall equipment that makes the sport of climbing fun and available to many locations. ClimbStation is easy-to-use and has TEN pre-set difficulty levels which can be customized to match the client base. The rotating climbing wall is a perfect functional full-body workout and fun activity. Also ClimbStation is available in multiple variants.

APSG Engineering

# UNIQUE FEATURES

## Safety

Using the climber & weight to create rotating movement increases safety as the wall will always stop when no one is climbing.

## Automatic start

ClimbStation K.E.R.S makes it possible to have a safe automatic start feature without pressing a single button. The wall detects the climber's weight and starts the program owner has chosen as default.

## Adaptive speed control and new top speed

ClimbStation adjusts its speed according to the speed of the climber. The system will find the right speed for both lightweight and heavier climber. With a 40% increase, the new ClimbStation now rolls a top speed of 25 meters per minute.

## Energy savings

The ClimbStation K.E.R.S works with low 24V / 2A energy input, compared to previous 230V / 10 A. This gives massive energy savings (more than 90% compared to 1st. generation logic panel and engine driven version).

## Multiple Pre-set programs

Beginner / Warm-up / Easy / Endurance / Strength  
/ Power / Athlete / Pro Athlete / Superhuman / Conqueror /  
Manual

## Restore function

The wall can be set to automatically return back to your preferred setting. This enables easy starting position for the next person to go. Together with the automatic start feature you may enjoy climbing without a press of a button.

## Terrain editor

10 pre-set difficulty levels which can be edited to match your client base liking.

## Climb data

As an owner you are able to control and limit the wall usage.

## Wide range of challenge

With the help of two powerful linear actuators the wall smoothly tilts between  $+15^{\circ}$  to  $-45^{\circ}$  degree negative and provides plenty of challenge even for the most demanding and skilled climbers.

## Speed climbing

With a maximum speed of 25 meters per minute the wall can be used for speed training for experienced climbers. Monitor results: Speed, distance, time, current angle, difficulty level and calorie consumption.

## Unlimited climbing

User can choose to proceed "to next exercise," "repeat," "random" or "manual" and the wall will proceed to selected mode after one terrain is climbed. Climbing will continue as long as you do. Between the change of terrain the wall will slow down for a few seconds to give you an indicate. You may edit one terrain to be a maximum 100 meters long.

## EFFICIENT

- Efficiency in training and performance
- Always in ready-to-use condition
- Low operating cost and staff participation

## ENTERTAINING

- Entertain both users and spectators
- Climb with the freedom of no ropes and harnesses
- Monitor your results and compete with friends

## VERSATILE

- Mobile and plenty of potential locations where to use it
- For all ages and skill levels
- Branding and advertising possibilities.
